Education

Stony Brook University

Stony Brook, NY

B.S. in Computer Science; B.S. in Applied Mathematics & Statistics (Double Major), GPA: 3.3/4.0

Aug. 2023 – May 2027

- **Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Programming Abstractions, System Fundamentals, Data Analysis, Theory of Computation, Software Engineering Principles

Experience

Technology Summer Analyst | Accenture (Client: Frontier AI Hyperscaler)

June 2026 – Aug. 2026

- Supporting technical delivery for a leading frontier AI hyperscaler client
- Collaborating with cross-functional consulting and engineering teams in an Agile environment to build and ship solutions across the client's platform

Software Developer Intern | Nestingale

May 2025 – Aug. 2025

- Developed and maintained internal full-stack tools used by 20+ team members to manage supplier data, reducing manual data configuration by ~40% and accelerating supplier onboarding workflows
- Designed CMS pages and frontend features that improved data visibility and navigation, reducing workflow friction ~30%
- Delivered 1–2 feature enhancements per weekly sprint across Agile teams, incorporating stakeholder feedback

Frontend Developer | Jag International Trim

June 2024 – Aug. 2024

- Developed a visually dynamic website with interactive graphics and animations, improving user engagement and overall usability across key pages
- Implemented an AWS-based email reception pipeline that automated inbound email handling, reducing manual processing by ~40–50%

Frontend Developer | WebRising

June 2021 – June 2023

- Built full-stack web solutions for local businesses as part of a collaborative, volunteer-based organization supporting digital presence and continuity during the COVID-19 pandemic

Projects

wandr | Swift & Go

Dec. 2025 – Present

- Developed an iOS social media platform for travelers that combines trip planning, photo/itinerary sharing, event discovery, and community features, leveraging LLMs for personalized travel planning and geolocation data for cultural and local insights

Dynamic Memory Allocator | C

Feb. 2026 – Mar. 2026

- Built a custom C memory allocator (malloc/free/calloc/realloc) with aligned metadata, block splitting, and coalescing; added a CLI tool for function testing, heap visualization, and fragmentation analysis

Pomodoro Study Tool | Django, React & Tailwind CSS

Apr. 2025 – June 2025

- Developed and deployed a full-stack Pomodoro study web application featuring user authentication, customizable timers, and session analytics, hosted on Fly.io

Skills

Languages: Python (Jupyter Notebook, pandas, Matplotlib, scikit-learn), Java, JavaScript, C, OCaml, R

Frontend Frameworks/Libraries: React, Next.js, Vue.js, TypeScript, Tailwind CSS, SCSS

Backend Frameworks/Libraries: Node.js, Express.js, Django, PostgreSQL, MongoDB, REST APIs

Developer Tools: Git, GitHub, npm, AWS, Figma, Cursor, Claude Code, Agile (Scrum, CI/CD)
